Top 25 Game Developer

I am proud to be named one of the **Top 25 Game Developers** by Digital Confex at the Gaming and Animation (GNA) Confex in Dubai. This award highlights our contributions and commitment to excellence.

<https://digitalconfex.com/awardees-gna-confex-23-sept-2023/>

Services I Provide

I am deeply passionate about creating games that ignite our enthusiasm, regardless of the genre. With a rich history of developing a wide range of games for mobile, desktop, and virtual reality platforms, we demonstrate our versatility and commitment to excellence in game development.

Game Development

I offer full-cycle game development, including concept, design, and prototyping. Services include Unity development (2D/3D, VR/AR), art and animation, QA/testing, game porting, marketing/monetization (ASO, in-app purchases), live operations/support, and consultation/training.

Gamification

I think using game-like features can change the way businesses connect with people. Our services add fun, game elements to your business processes, apps, and customer interactions, making them more interesting and motivating. This helps keep users engaged and loyal.

Multiplayer

I specialize in creating attractive and dynamic multiplayer gaming experiences. My multiplayer services are designed to bring players together through interaction, competition, and collaboration in richly detailed virtual worlds. Whether you are looking to develop a new multiplayer game or enhance an existing one, I have the expertise to deliver seamless, high-performance multiplayer solutions.

Blockchain Games

I am the forefront of integrating blockchain technology with gaming to create revolutionary gaming experiences. My blockchain games are designed to harness the power of decentralization, ensuring transparency, security, and true ownership for players.

Virtual Reality

Whether you aim to develop a cutting-edge VR game or a training simulation, I am dedicated to pushing the boundaries of digital experiences through innovative Virtual Reality (VR) solutions for different VR devices including Oculus, Meta Quest 2, and Meta Quest 3.

Augmented Reality

I am specialize in creating innovative Augmented Reality (AR) experiences that seamlessly mix the digital and physical worlds. Whether you're looking to develop an AR application for marketing, education, gaming, social media filters/games, or any other field, our experts can turn your idea into a reality.

Website Game & Backend Development

I am dedicated to creating stunning, functional, and user-friendly website games that help businesses thrive in the digital landscape.

Technologies I Use

Unity Game Engine

I started my journey into mobile game development using Unity and have leveraged the framework to create numerous Android and iOS games, including our 10+ million download hit, "BarberChop."

Unreal Engine (UEF)

I leverage Unreal Engine, the creators of Fortnite, to design and develop custom Fortnite maps and immersive in-game experiences. Using Unreal Engine's advanced visual tools, dynamic lighting, and flexible blueprint scripting, I create engaging and visually striking Fortnite environments that push creative boundaries.

Roblox

I leverage Roblox Studio and its powerful scripting language, Lua, to develop immersive, interactive 3D experiences and multiplayer games.

Multiplayer Solutions

I use powerful multiplayer technologies like **Photon (PUN, Fusion, Quantum) and Mirror** for real-time Unity networking. For backend services, I rely on **PlayFab and Firebase** for authentication, leaderboards, and cloud integration. I also work with **Nakama** and **Socket.IO** for custom multiplayer systems. Exploring next-gen multiplayer with **SpaceTimeDB** to deliver cross-platform experiences.

AR/VR Solutions

I create immersive AR/VR experiences, from polished Oculus games with engaging, user-driven gameplay to cross-platform AR solutions using ARFoundation, Vuforia, and OpenCV, including WebAR for browsers. I also design interactive AR filters for Snapchat, Instagram, TikTok, and Facebook to boost brand engagement.

AI Agents

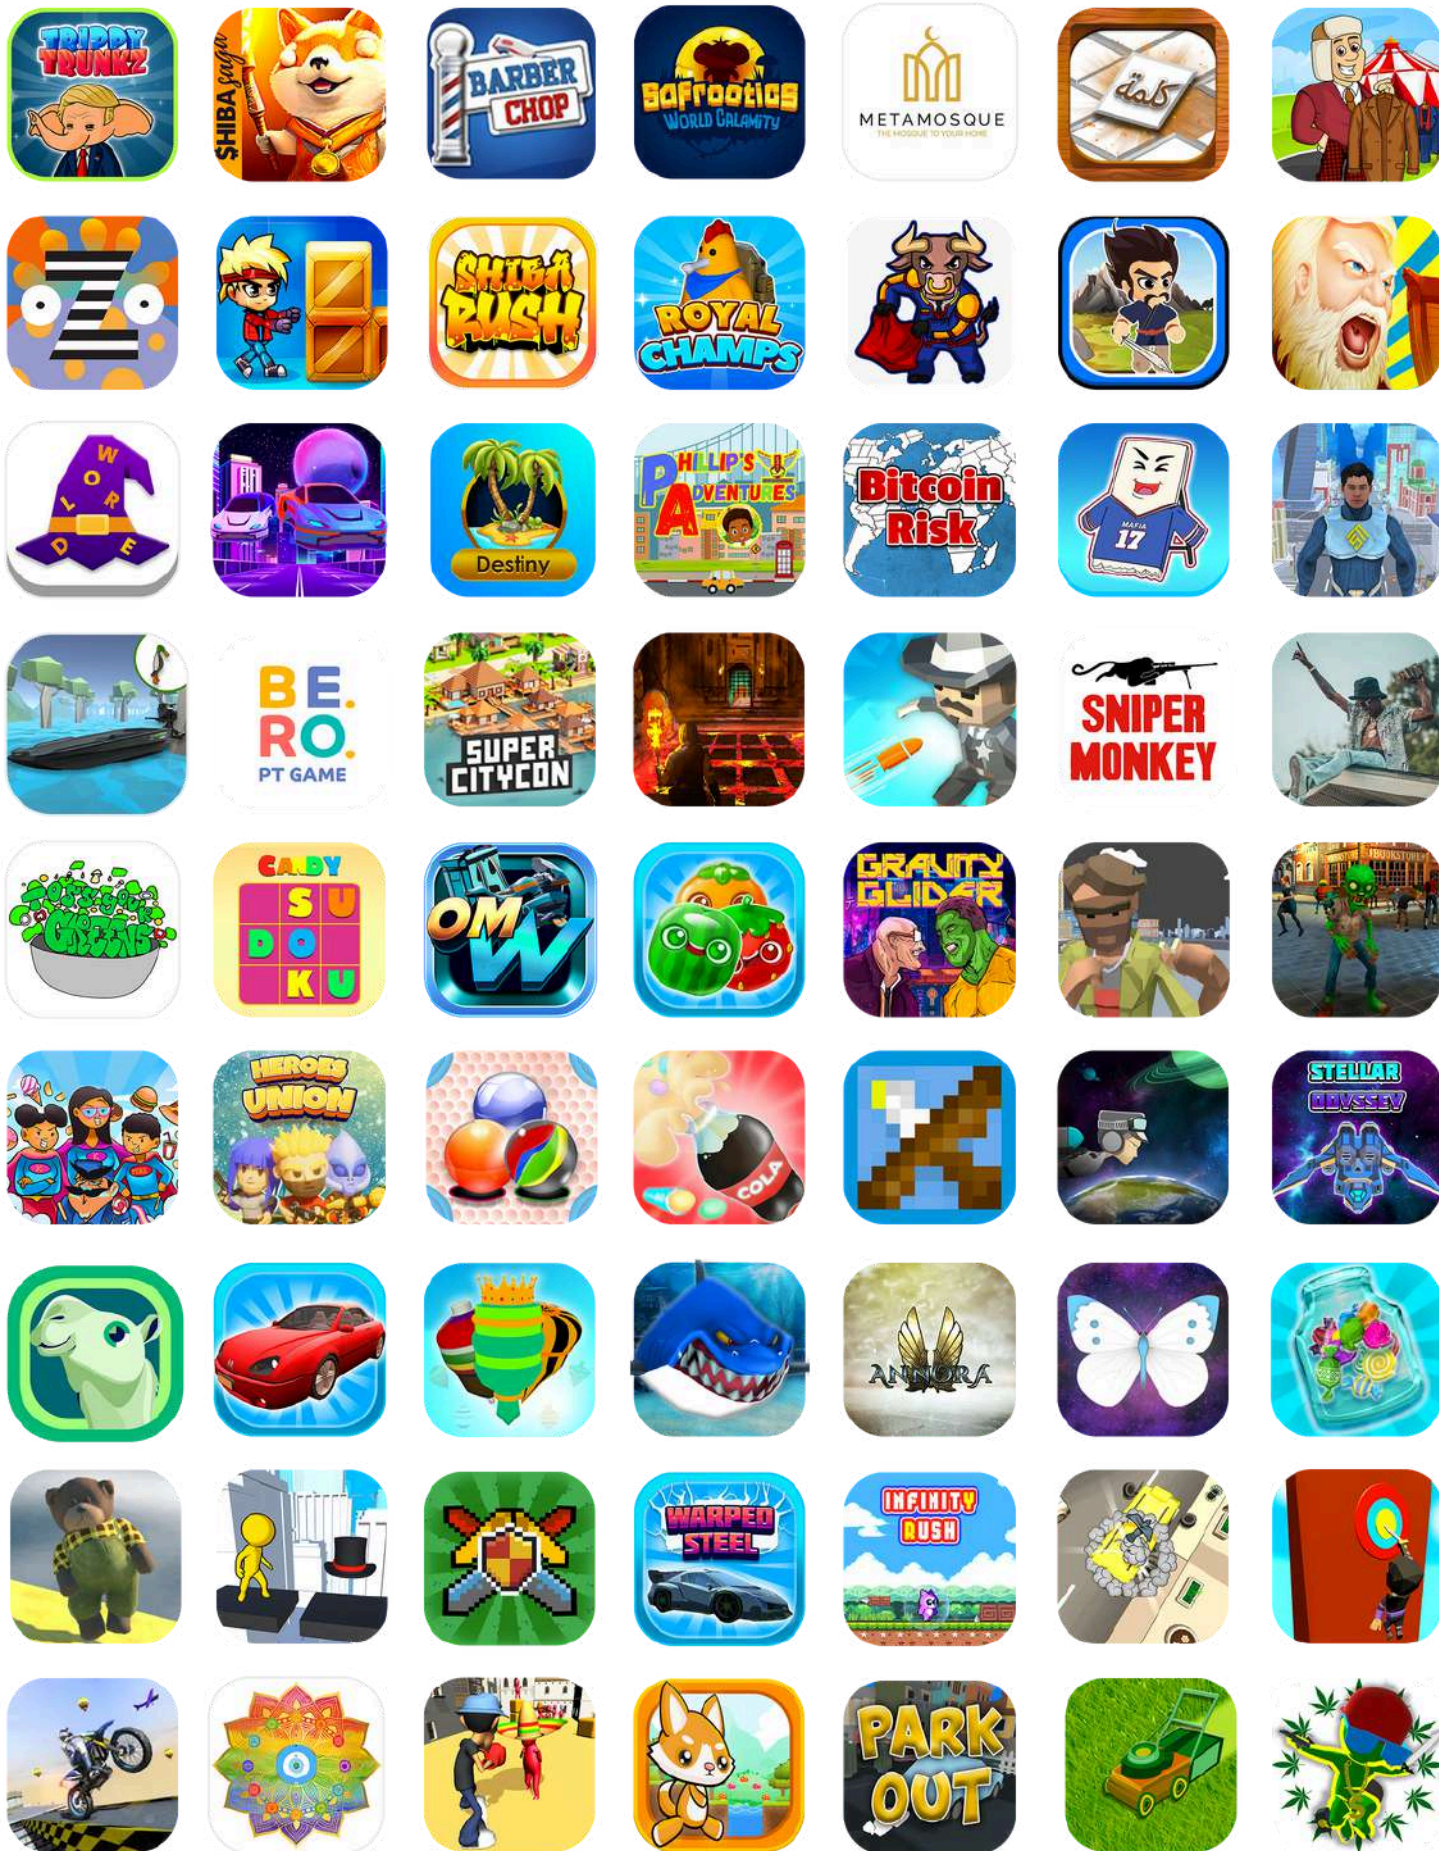

I develop and train intelligent AI agents tailored to specific needs, enabling automation, decision-making, and personalized interactions. My work includes building adaptive systems that learn from data, improve over time, and deliver efficient solutions across industries. From customer support bots to task-driven assistants, I design agents that enhance productivity, engagement, and user experience.

I also utilize a plethora of tools and technologies to bring my clients' ideas to reality.

My Portfolio

Over the past decade, I have completed over 1000+ projects all around world uptill 2024.

My Proud Projects

Meta Mosque

- VR, AI, Android, iOS & PC

My Clients

I take pride in cultivating strong partnerships with a diverse array of clients, ranging from startups to prominent global organizations. My commitment to excellence and innovation has helped establish a solid reputation within the industry. I collaborate with **Vodafone**, which has 104,000 employees, to deliver cutting-edge solutions that enhance telecommunications and customer experiences. I've also worked with **Fruits Music** — formerly known as **Strange Fruits** — an international label dedicated to dance music enthusiasts, helping them leverage technology to expand their global reach.

My contributions to **Kevin O'Leary's** project, the renowned businessman and investor, further reflect my dedication to delivering exceptional results. I've collaborated with **Meta Mosque** to offer virtual visits to historical mosques, enhancing cultural engagement through immersive technology. Additionally, I'm working with **Arcane World Studio** on an AAA PC game that has already secured over 300,000 wishlists.

Beyond these projects, I've built strong relationships with leading publishing companies like **Kwalee**, **Voodoo**, **Goodjob Games**, **Huma Games**, and more. Alongside these collaborations, I proudly support over **400 individual clients** and their **startups**, providing tailored solutions that drive growth and spark innovation.

World Domination 36%

Why Choose Me

I don't just develop games and apps – I bring ideas to life.

My passion for game development drives me to transform concepts into reality. I see my clients as more than just customers; they are invaluable partners whose feedback shapes the success of every project. I am fully committed to understanding and exceeding their expectations, assembling the right team and resources to bring their visions to life and ensure commercial success.

With millions of downloads across platforms like Playstore, Appstore, and Steam, I've built a reputation for creating games that keep players engaged and satisfied. My success is rooted in strong teamwork, open communication, a commitment to excellence, and strict adherence to industry best practices.

I take pride in leveraging the insights and expertise of industry leaders to craft innovative solutions that elevate both project quality and profitability. This dedication to delivering exceptional results is why clients choose to work with me and Techshield for their game development needs. Together, we create unforgettable gaming experiences that resonate with players worldwide.
